

Causes of Infant & Child Deaths

HMIS – 2013 – 14

India - Causes of Infant Deaths - HMIS - 2013 - 14 - IMR = 40		
Estimated Population - 2013	1,265,309,041	
CBR - SRS - 2013	21.4	
Estimated Live Births	27,077,613	
Reported Infant Deaths	119,211	
Infant deaths per 1000 Estimated live Births	4	
Early Neonatal deaths per 1000 Estimated live Births	3	
Late Neonatal deaths per 1000 Estimated live Births	1	
	Total	%ge against Total Infant Deaths reported
Number of cases of Infant deaths within 24 hrs of birth	12,340	10%
Number of cases of Infant deaths 24 hours to one week of birth with the probable cause being Sepsis	5,607	5%
Number of cases of Infant deaths one week to 4 weeks of birth with the probable cause being Sepsis	2,230	2%
Number of cases of Infant deaths 24 hours to one week of birth with the probable cause being Asphyxia	14,213	12%
Number of cases of Infant deaths one week to 4 weeks of birth with the probable cause being Asphyxia	1,846	2%
Number of cases of Infant deaths 24 hours to one week of birth with the probable cause being LBW	19,325	16%

India - Causes of Infant Deaths - HMIS - 2013 - 14 - IMR = 40		
Number of cases of Infant deaths one week to 4 weeks of birth with the probable cause being LBW	4,420	4%
Number of cases of Infant deaths 24 hours to one week of birth with the probable cause being other than Sepsis, Asphyxia and LBW	22,523	19%
Number of cases of Infant deaths one week to 4 weeks of birth with the probable cause being other than Sepsis, Asphyxia and LBW	7,490	6%
Number of cases of Infant between 1 month to 11 months of age with the probable cause being Pneumonia	5,644	5%
Number of cases of Infant deaths between 1 month to 11 months of age with the probable cause being Diarrhoea	911	1%
Number of cases of Infant deaths between 1 month to 11 month of age with the probable cause being Fever related	2,119	2%
Number of cases of Infant deaths between 1 month to 11 month of age with the probable cause being Measles	42	0.04%
Number of cases of Infant deaths between 1 month to 11 month of age with the probable cause being other than Pneumonia, Diarrhoea, Fever related and Measles	20,501	17%

India - Causes of Child Deaths (between 1 yr to 5 yrs) - HMIS - 2013 - 14		
Types of Diseases	Total	%ge against Total Child Deaths reported
Number of cases of Child deaths 1 yr to 5 yrs of age with the probable cause being Pneumonia	1,410	9.9%
Number of cases of Child deaths between 1 yr to 5 yrs of age with the probable cause being Diarrhoea	740	5.2%
Number of cases of Child deaths between 1 yr to 5 yrs of age with the probable cause being Fever related	1,432	10.0%
Number of cases of Child deaths between 1 yr to 5 yrs of age with the probable cause being Measles	43	0.3%

Number of cases of Child deaths between 1 yr to 5 yrs of age with the probable cause being other than Pneumonia, Diarrhoea, Fever related and Measles	10,653	74.6%
Total Child deaths between 1 yr to 5 yrs of age	14,278	

Andhra Pradesh - Causes of Infant Deaths - HMIS - 2013 - 14 - IMR = 39		
Estimated Population - 2013	8,71,49,770	
CBR - SRS - 2013	17.4	
Estimated Live Births	15,16,406	
Reported Infant Deaths	4,148	
Infant deaths per 1000 Estimated live Births	3	
Early Neonatal deaths per 1000 Estimated live Births	1.48	
Late Neonatal deaths per 1000 Estimated live Births	0.50	
	Total	%ge against Total Infant Deaths reported
Number of cases of Infant deaths within 24 hrs of birth	125	3%
Number of cases of Infant deaths 24 hours to one week of birth with the probable cause being Sepsis	55	1%
Number of cases of Infant deaths one week to 4 weeks of birth with the probable cause being Sepsis	12	0.29%
Number of cases of Infant deaths 24 hours to one week of birth with the probable cause being Asphyxia	314	8%

Andhra Pradesh - Causes of Infant Deaths - HMIS - 2013 - 14 - IMR = 39
