

Access to Quality Healthcare

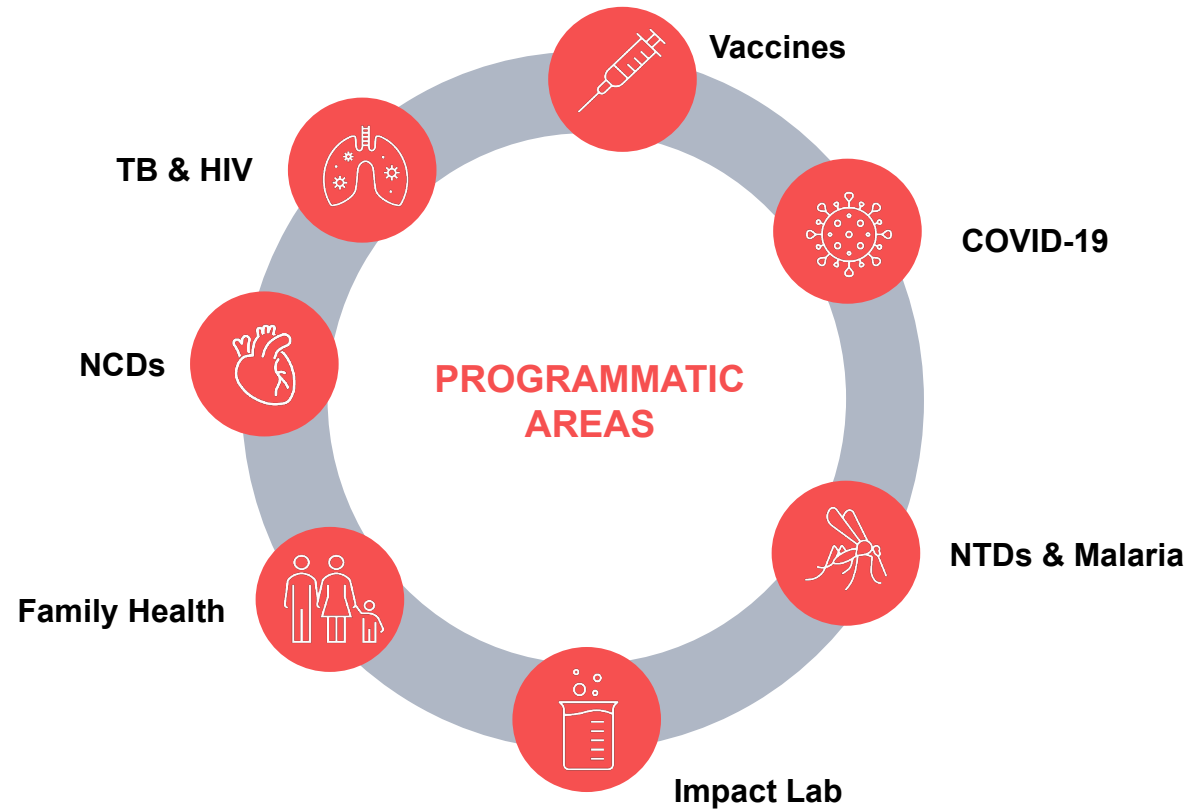

PATH

An international not-for-profit organization with headquarters in Seattle, USA and presence in more than 70 countries

Work across five platforms — vaccines, drugs, diagnostics, devices, and system and service innovations

PATH has been in India for 40+ years and has evolved as a trusted partner for government for various disease interventions

OUR VALUES

Adaptive learning and collaboration

State-owned and country-tailored

Inclusive stakeholder engagement

Integrated equity and gender lens

Data and evidence-based & driven

PATH India's Vision and Goals on Quality in HealthCare

Vision: Facilitate in building systems providing access to equitable, affordable, and quality healthcare services

Specific Goals

Generate **Evidence Base** on the direct and indirect impacts of quality accreditation of facilities / quality services in facilities on public health outcomes including access, utilization, patient satisfaction, etc

Build **Partnerships** with central and state governments, NHSRC, SHSRCs, academic institutions, research bodies to co-create solutions and leverage innovations for provision of quality-of-care services at public health facilities

Build political will and public interest in achieving NQAS targets through **Advocacy and Education**

Geographical Reach and Level of interventions

Maharashtra – Technical Assistance, training and supporting for baseline assessment of AB HWCs in the District of Satara

Planned Activities till December, 2023

Maharashtra –

1. Conduct two days training of PHC and SHC staff. (ToT for CHO and MO developed)
2. Support district in drafting SoPs for PHCs and SHCs
3. Support district in conducting internal assessment for targeted facilities
4. Conduct gap analysis for selected facilities and provide technical support to facilities for filling out gaps
5. Conduct monthly meeting of district quality assurance cell to review performance of facilities in quality improvement

Bihar – By the directions of DoHFW, Bihar District Hospital Buxar and District Hospital Vaishali will be prioritized for baseline assessment and gap closures.

Suggestions for coordination & addressing technical assistance needs

- 2 days workshop for knowledge update and presentation of existing work
- Joint visits to intervention areas / facilities
- Brainstorming with States / UTs to understand the needs
- Discussions to understand the field gaps
- Orientation of SQAC and DQAC for planning.
- State level review of DQAC meetings with an approach to achieve 2025-26 NQAS targets
