Date: 07 July 2023

Subject: Online Lecture Series on Standard Treatment Guidelines

Dear All,

WHO reports poisoning is one of the most common causes of increased morbidity and mortality rate in worldwide. Exposure to agrochemicals, medicines and environmental agents are the major causes of accidental poisoning. Emotional disturbances and chronic diseases are the common reasons for intentional poisoning. The study says 26.5 deaths occur per 1 lakh population in the case of poisoning.

Most of the poison consumption leads to mortality if untreated within first few hours. Therefore, it is important to use antidotes or specific measures to those patients with clear indications and sometimes require supportive therapy alone to recover and in rare cases includes mechanical ventilation and circulatory support for survival of patient.

By considering the importance of general management of poisonous cases at early stage, the next session – **"Poisoning: General principles of Management"** has been scheduled on 15th July 2023. **Dr Jamshed Nayer**, Professor, Department of Emergency Medicine, AIIMS, New Delhi will be the speaker of this session.

Along with this the technical session on **"Prescribing in Liver & Renal Impairment"** will be taken by **Dr Sangeeta Sharm**, Professor-IHBAS and President, DSPRUD.

You are requested to disseminate the information to all public healthcare facilities and available clinicians, nurses and health professionals and encourage them to join the webinar. The agenda of the session is placed at **Annexure 'A'**.

Registration Link for the Lecture series is given below –

Date: 15.07.2023

Time: 2.45 PM to 5.00 PM
