Dated: 10 September, 2024

Subject: World Patient Safety Day Event, 18th September 2024

Dear Mission Director

NHSRC on behalf of Ministry of Health & Family Welfare has been observing World Patient Safety Day every year since 2020 to increase public awareness and engagement. This is in accordance with World Health Assembly resolution WHA 72.6 on 19th May 2019 urging the member countries to keep patient safety as a key strategic priority.

The theme for World Patient Safety Day 2024 is **“Improving diagnosis for patient safety”**. The themes call for concerted efforts to significantly reduce diagnostic errors through a variety of interventions rooted in systems thinking, human factors and actively engaging patients, their families, health workers and healthcare leaders. The key slogan for the 2024 campaign is **“Get it right, make it safe”**

As a part of observing World Patient Safety Day, a national seminar will be held on 18th September 2024, at Silver Oak Hall of India Habitat Centre, New Delhi. Leading experts have committed to dwell into different dimensions of diagnostics and patient safety. We also plan to hold a session where state and facility level patient safety activities will be shared by the states.

We request you to nominate 2-3 officers to represent your state / union territory in this national event. The selected officers may be nominated from various levels like state and district quality teams, district hospitals and primary healthcare facilities. NHSRC will make arrangements for their accommodation and local travel to and fro between hotel and the venue.

Details of the nominated officers from your State / UT to Dr.Ratan Shekhawat, Consultant, QPS Division, NHSRC (Phone: 8586930006, Email: ratanshekhawat@nhsrindia.org) by 11th September 2024.

Regards,

Yours sincerely,
