**D.O. No.Z.15015/10/2023-NHM-I**  
**Dated the 28<sup>th</sup> January, 2025**

Dear Shri Nara Chandrababu Naidu Ji,

As you are aware, the Government of India, through the National Health Mission (NHM), is committed to ensure access to quality healthcare for all citizens, particularly in underserved and vulnerable populations. The provision of free essential drugs and diagnostics in public healthcare facilities, a cornerstone of this mission, is aimed at reducing the financial burden on patients, especially those belonging to rural areas and economically weaker sections of society.

The Ministry of Health and Family Welfare has issued list of Essential Medicines and Essential Diagnostics to be made available at public healthcare facilities. The number of minimum essential medicines prescribed for Sub Health Centre - Ayushman Arogya Mandir (SHC AAM) is 106, for Primary Health Centre Ayushman Arogya Mandir (PHC AAM) - 172, for Community Health Centre (CHC) - 300, for Sub-Divisional Hospitals (SDH) - 318, and for District Hospital (DH) - 381. Similarly, the number of diagnostics in the Essential Diagnostics List for each facility i.e. SHC is 14, PHC - 63, CHC - 97, SDH - 111, and for DH - 134.

Support is also available for setting up a robust system of procurement, Quality Assurance, supply chain management and warehousing, prescription audit, grievance redressal, dissemination of standard treatment guidelines, and the establishment of an IT-enabled Drugs & Vaccine Distribution Management System (DVDMS) portal, for monitoring the real status of procurement and availability.

However, the effective execution of this initiative depends largely on the States/Union Territories. I urge your kind intervention for taking following measures:

- Ensuring timely procurement and availability of essential drugs and diagnostics at all public health facilities.
- Establishing strong supply chain mechanisms to guarantee timely delivery, reduce stock-outs and wastage, and maintain proper storage conditions.
- Implementing robust monitoring mechanisms and feedback processes involving health professionals, public representatives, and citizens.
- Launching comprehensive public awareness campaigns through media, community outreach and elected public representatives to educate citizens about free services and promote their utilization.

Your leadership is critical in achieving the desired outcomes. I request you to personally oversee the effective implementation of this initiative across all government health facilities in your State and to initiate a massive awareness drive to ensure citizens are informed and encouraged to utilize these services at their local health facilities.

**Contd../-**

-2-

The Ministry stands committed to provide any assistance or guidance that may be needed in this regard. Together, we can make significant strides in improving the health and well-being of our citizens.

With regards,

Yours sincerely,

(Jagat Prakash Nadda)

**D.O. No.Z.15015/10/2023-NHM-I**  
**Dated the 28<sup>th</sup> January, 2025**

Dear Shri Bhupendrabhai Rajnikant Patel Ji,

As you are aware, the Government of India, through the National Health Mission (NHM), is committed to ensure access to quality healthcare for all citizens, particularly in underserved and vulnerable populations. The provision of free essential drugs and diagnostics in public healthcare facilities, a cornerstone of this mission, is aimed at reducing the financial burden on patients, especially those belonging to rural areas and economically weaker sections of society.

The Ministry of Health and Family Welfare has issued list of Essential Medicines and Essential Diagnostics to be made available at public healthcare facilities. The number of minimum essential medicines prescribed for Sub Health Centre - Ayushman Arogya Mandir (SHC AAM) is 106, for Primary Health Centre Ayushman Arogya Mandir (PHC AAM) - 172, for Community Health Centre (CHC) - 300, for Sub-Divisional Hospitals (SDH) - 318, and for District Hospital (DH) - 381. Similarly, the number of diagnostics in the Essential Diagnostics List for each facility i.e. SHC is 14, PHC - 63, CHC - 97, SDH - 111, and for DH - 134.

Support is also available for setting up a robust system of procurement, Quality Assurance, supply chain management and warehousing, prescription audit, grievance redressal, dissemination of standard treatment guidelines, and the establishment of an IT-enabled Drugs & Vaccine Distribution Management System (DVDMS) portal, for monitoring the real status of procurement and availability.

However, the effective execution of this initiative depends largely on the States/Union Territories. I urge your kind intervention for taking following measures:

- Ensuring timely procurement and availability of essential drugs and diagnostics at all public health facilities.
- Establishing strong supply chain mechanisms to guarantee timely delivery, reduce stock-outs and wastage, and maintain proper storage conditions.
- Implementing robust monitoring mechanisms and feedback processes involving health professionals, public representatives, and citizens.
- Launching comprehensive public awareness campaigns through media, community outreach and elected public representatives to educate citizens about free services and promote their utilization.

Your leadership is critical in achieving the desired outcomes. I request you to personally oversee the effective implementation of this initiative across all government health facilities in your State and to initiate a massive awareness drive to ensure citizens are informed and encouraged to utilize these services at their local health facilities.

**D.O. No.Z.15015/10/2023-NHM-I**  
**Dated the 28<sup>th</sup> January, 2025**

Dear Shri Conrad K. Sangma Ji,

As you are aware, the Government of India, through the National Health Mission (NHM), is committed to ensure access to quality healthcare for all citizens, particularly in underserved and vulnerable populations. The provision of free essential drugs and diagnostics in public healthcare facilities, a cornerstone of this mission, is aimed at reducing the financial burden on patients, especially those belonging to rural areas and economically weaker sections of society.

The Ministry of Health and Family Welfare has issued list of Essential Medicines and Essential Diagnostics to be made available at public healthcare facilities. The number of minimum essential medicines prescribed for Sub Health Centre - Ayushman Arogya Mandir (SHC AAM) is 106, for Primary Health Centre Ayushman Arogya Mandir (PHC AAM) - 172, for Community Health Centre (CHC) - 300, for Sub-Divisional Hospitals (SDH) - 318, and for District Hospital (DH) - 381. Similarly, the number of diagnostics in the Essential Diagnostics List for each facility i.e. SHC is 14, PHC - 63, CHC - 97, SDH - 111, and for DH - 134.

Support is also available for setting up a robust system of procurement, Quality Assurance, supply chain management and warehousing, prescription audit, grievance redressal, dissemination of standard treatment guidelines, and the establishment of an IT-enabled Drugs & Vaccine Distribution Management System (DVDMS) portal, for monitoring the real status of procurement and availability.

However, the effective execution of this initiative depends largely on the States/Union Territories. I urge your kind intervention for taking following measures:

- Ensuring timely procurement and availability of essential drugs and diagnostics at all public health facilities.
- Establishing strong supply chain mechanisms to guarantee timely delivery, reduce stock-outs and wastage, and maintain proper storage conditions.
- Implementing robust monitoring mechanisms and feedback processes involving health professionals, public representatives, and citizens.
- Launching comprehensive public awareness campaigns through media, community outreach and elected public representatives to educate citizens about free services and promote their utilization.

Your leadership is critical in achieving the desired outcomes. I request you to personally oversee the effective implementation of this initiative across all government health facilities in your State and to initiate a massive awareness drive to ensure citizens are informed and encouraged to utilize these services at their local health facilities.

**Contd../-**

-2-

The Ministry stands committed to provide any assistance or guidance that may be needed in this regard. Together, we can make significant strides in improving the health and well-being of our citizens.

With regards,

Yours sincerely,

(Jagat Prakash Nadda)

**D.O. No.Z.15015/10/2023-NHM-I**  
**Dated the 25<sup>th</sup> January, 2025**

Dear Shri Yogi Adityanath Ji,

As you are aware, the Government of India, through the National Health Mission (NHM), is committed to ensure access to quality healthcare for all citizens, particularly in underserved and vulnerable populations. The provision of free essential drugs and diagnostics in public healthcare facilities, a cornerstone of this mission, is aimed at reducing the financial burden on patients, especially those belonging to rural areas and economically weaker sections of society.

The Ministry of Health and Family Welfare has issued list of Essential Medicines and Essential Diagnostics to be made available at public healthcare facilities. The number of minimum essential medicines prescribed for Sub Health Centre - Ayushman Arogya Mandir (SHC AAM) is 106, for Primary Health Centre Ayushman Arogya Mandir (PHC AAM) - 172, for Community Health Centre (CHC) - 300, for Sub-Divisional Hospitals (SDH) - 318, and for District Hospital (DH) - 381. Similarly, the number of diagnostics in the Essential Diagnostics List for each facility i.e. SHC is 14, PHC - 63, CHC - 97, SDH - 111, and for DH - 134.

Support is also available for setting up a robust system of procurement, Quality Assurance, supply chain management and warehousing, prescription audit, grievance redressal, dissemination of standard treatment guidelines, and the establishment of an IT-enabled Drugs & Vaccine Distribution Management System (DVDMS) portal, for monitoring the real status of procurement and availability.

However, the effective execution of this initiative depends largely on the States/Union Territories. I urge your kind intervention for taking following measures:

- Ensuring timely procurement and availability of essential drugs and diagnostics at all public health facilities.
- Establishing strong supply chain mechanisms to guarantee timely delivery, reduce stock-outs and wastage, and maintain proper storage conditions.
- Implementing robust monitoring mechanisms and feedback processes involving health professionals, public representatives, and citizens.
- Launching comprehensive public awareness campaigns through media, community outreach and elected public representatives to educate citizens about free services and promote their utilization.

Your leadership is critical in achieving the desired outcomes. I request you to personally oversee the effective implementation of this initiative across all government health facilities in your State and to initiate a massive awareness drive to ensure citizens are informed and encouraged to utilize these services at their local health facilities.
