Subject: Updation of Facility Data on NIN Portals to Enable Seamless Functioning of SaQsham Portal for NQAS Certification

Dear Mission Director,

During the recent National Quality Assurance Standards (NQAS) Implementation Review Meeting held on 28–29 May 2025 at New Delhi, one of the key challenges highlighted by various States/UTs pertained to difficulties in mapping health facilities on the SaQsham Portal. As you are aware, the SaQsham Portal is the national platform developed for digitizing and streamlining the NQAS certification process.

2. The mapping process on SaQsham relies on the availability of accurate and complete facility-level data; block name, taluka, district, and unique NIN ID, sourced via APIs from the NIN Portal. However, it has been observed that data it is often missing, inconsistent, or outdated in the NIN ID Portal. This is hampering the ability of States/UTs to effectively map their health facilities, thereby delaying certification and reporting activities under NQAS.

3. To address this issue, you are requested to kindly instruct the State HMIS Nodal Officer & NIN Nodal Officer to work in close coordination and ensure that the facility data available is reviewed and updated with the NIN ID Portal at the earliest. This step is critical for ensuring seamless data flow into the SaQsham Portal and for maintaining the integrity of the certification process.

4. Your kind cooperation and prompt action on this matter will be highly appreciated

With regards,

Yours sincerely,

(Saurabh Jain)

To
Mission Director- All States/UTs
