# Mapping issues of healthcare facilities in SaQsham

Inputs from HMIS Unit, Statistics Division

STAKEHOLDERS INVOLVED

NIN

- **National Identification Number (NIN)** for health facilities is a **unique 10-digit number** assigned to every health facility.

- Designated users have the rights to ADD/ EDIT a new facility (at State/ District Level).

- After successful entry of the required details for a particular facility a NIN id is assigned

SaQsham

The primary objectives of the SAQSHAM portal are:

• **Quality Assessment**: Facilitate self-assessment of health facilities against established quality standards to identify areas of improvement.

• **Certification Support**: Assist facilities in preparing for **National Quality Assurance Standards (NQAS)** certification, ensuring they meet national benchmarks for healthcare quality.

• **Continuous Improvement**: Promote a culture of ongoing quality enhancement through regular assessments and feedback mechanisms.

• **Data Repository**: Maintain a centralized database of facilities' quality assessments and certifications for monitoring and policy-making purposes.

HMIS

- NIN is seeded at the time of a facility creation
- NIN ID created in the NIN portal is seeded **MANUALLY** in the facility record.
- Initially the State/ District Admin who created the facility had the rights to do so.
- But gradually, the rights were withdrawn IN ORDER TO ENSURE ACCURACY
- HMIS TEAM had done an extensive exercise one year back to clean the NIN data

HMIS

- Now whenever correction/ updation is needed in NIN the state teams communicate the same to National HMIS Team.

- HMIS Team Validates the NIN number provided by the State Team in NIN portal and ensure that the details are same.

- It is also ensured that the NIN is not duplicate in HMIS

- National HMIS team facilitates NIN Updation/ Correction.

- THE PROCESS ENSURES CORRECTNESS OF NIN
