D.O. No. Z.18015/27/2022-NHM-II(Pt-3)
Dated 21st April, 2025

Dear *Mission Director,*

As you are aware, the National Quality Assurance Standards (NQAS) have been developed through a consultative process, incorporating program guidelines, Indian Public Health Standards (IPHS), and other relevant frameworks. Adherence to these quality standards, and meeting the certification criteria are mandatory for obtaining NQAS certification.

Recognizing the diverse healthcare needs across States/UTs, NQAS allows flexibility in customizing the checklists based on state specific requirements. In this context, NQAS often receives multiple requests from the States/UTs for customizing the number of departments in the checklist for NQAS certification for Community Health Centres (CHCs).

As per the IPHS 2022 guidelines, CHCs are generally 30-bedded facilities categorized into:

- **First Referral Unit (FRU) CHCs**, which are mandated to have specialized services provided through physicians, surgeons, obstetricians, paediatricians, anaesthesiologists, secondary-level surgical services (elective & emergency), and a Blood Storage Unit.
- **Non-FRU CHCs**, which are not mandated to provide above mentioned services, but they are desirable.

Therefore, it is expected that all CHC level activities would compulsorily be assessed in nine departments namely OPD, IPD, Laboratory, Labour Room, OT, Accident & Emergency, Auxiliary Services, Pharmacy, and General Administration.

In addition, FRU CHCs will be assessed in three mandatory departments: Radiology, Blood Storage Unit, and Newborn Stabilization Unit (NBSU). Hence, to ensure uniformity, States/UTs are requested to adhere to following points.

1. Line listing of all CHCs functioning as FRU & Non-FRU CHCs.
2. For Non-FRU CHCs, minimum of 9 departments must be included.
3. Customization, once approved, will remain valid for two years.

Thanking you,

Your sincerely,

(Signature)

Sub: Orientation workshop (Virtual Mode) on preparation of "Action Plan for NQAS Assessed Facilities"

Dear Sir/ Madam,

As you are aware that the facilities which have undergone the NQAS assessments are required to prepare an action plan for the traversing of the gaps observed during the assessments (both External and Surveillance), for continually striving to improve the quality of the services being provided by the healthcare facilities.

The action plan is also needed to be submitted by the certified healthcare facilities to the State Quality Assurance Units which is further verified during the Surveillance Assessments and progress report is submitted to the Certification Unit, NHSRC.

In the above context, Quality and Patient Safety Division, NHSRC is organizing an Orientation Workshop (Virtual Mode) on 7th October 2024 from 2:30 pm to 5:00 pm for State Quality Nodal Officers, State Consultants and Regional/ District Consultants to orient them on the preparation and verification of action plan the NQAS Assessed facilities.

Workshop link will be shared in the due course of time.

With regards

Yours sincerely

Handholding of the State

Request received from State

✓ | Drafting the Policies like Quality Policies, Condemnation policy etc

✓ | Drafting of the facility specific quality documents & SOP

✓ | Preparation of facility specific action plan for improving the quality

✓ | Guiding facilities during Filed visit

Action Taken

Reference document for requested policies & SOPs were shared by State Consultant
